

## Step 1: Install the Plugin and Set Secret Key

1. Install the "WooCommerce Custom Payment Integration" plugin on your website.
2. Navigate to the plugin settings and locate the option to set the secret key.
3. Enter your secret key in the designated field and save the settings.

## Step 2: Create Webhook on Payment Gateway

1. Log in to your payment gateway account.
2. Navigate to the webhook or integration settings.
3. Create a new webhook and set the URL to:
4. ``http://yourdomain.com/wp-json/custom-webhooks/v1/payment``
5. Replace ``yourdomain.com`` with your actual domain name.
6. Configure the webhook to trigger events related to payment processing.

## Step 3: Set up Cron Job

1. Access your website's cPanel or hosting control panel.
2. Locate the option for cron jobs or scheduled tasks.
3. Create a new cron job and set the URL to:

4. ``http://yourdomain.com/wp-content/plugins/woocommerce-custom-payment-integration/process_payments_cron.php``
5. Replace ``yourdomain.com`` with your actual domain name.
6. Choose the frequency and timing for the cron job based on your requirements.
7. Save the cron job settings.
